

Our Walkin' Wheels Wheelchair licence plates (measuring 7.5 x 15cm approx) can be printed with text or images. After purchasing your plate, please send us details of the text or an image. We will create an illustration for your approval before printing.

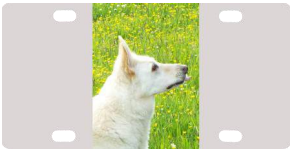

See below for our guide on how to select the best image for your plate:

Email images to: info@traininglines.co.uk

A standard number plate with text and a yellow background.

Just let us know what you wanted printed on it.

For a picture plate we need an image of your pet.

The plate is rectangular so a portrait or square image will **NOT** work. It must be a landscape image.

A picture that is not zoomed in on the subject, and where there is plenty of background will work best, as it gives us some flexibility to enlarge or crop as required.

If enlargement is necessary, sharper/higher resolution images produce a better print.

Check the picture carefully, particularly what is in the background, as it will all be printed.

A name can be added to the image if there is sufficient room.

Let us know your colour preference.

Please Note: The plate has holes punched in it to allow it to be fixed to the wheelchair (see picture bottom left), so take this into consideration when selecting a picture.
